LARGEST GROWERS and COMMERCIAL PLANTERS of NUT TREES in OREGON
SINCE 1919

1949-50

FILBERT TREES

Now, more than ever before, select from reliable licensed growers. Record bearing strains. Best propagating methods used. Grown under natural soil and moisture conditions. Not irrigated or fertilized yet have large caliper trunks and heavy root systems.

A well planned Barcelona filbert orchard of heavy bearing strain, properly managed is a good investment when compared with other farm crops.

We sell only our own trees.

WALNUT TREES --- Grafted Franquette (Vrooman Strain)

We have the grafted Franquette (Vrooman strain) on either Blach or English root stock. These trees are grafted 1 ft. above the ground to help overcome girdling.

FILBERT PRICES

Tip Layered

Place No. of trees Here and Return	
.....2 to 3 ft.....	.40
